

The University has implemented a system for submitting new course proposals as well as any changes to existing courses or programs. All steps will now be done electronically through Curriculog, a curriculum management workflow tool developed through the Registrar's Office.

To access Curriculog, go to <https://udel.curriculog.com/> and use your CAS credentials to login.

The Registrar's Office has redeveloped the materials available on its website to assist users with tutorials and more information at http://www1.udel.edu/registrar/faculty_staff/curriculog.html

All course proposals and revisions must be at the CAS Educational Affairs step by October 29, 2020. All new or revised program proposals must be to the CAS Educational Affairs step in **final** form by November 6, 2020. No revisions or corrections will be allowed after that date.

Finally, for all new programs or program revisions, at the undergraduate or graduate level, please ensure you indicate the correct CAS portfolio the degree program is housed within. Failure to indicate the correct CAS portfolio will route the curriculog form to the incorrect CAS Associate Dean and can either delay or prevent your proposal's eventual approval by the Educational Affairs Committee and/or the College Senate.
